

FCI Flood Appraisal

Commercial | Residential

ASHFIELD
— SOLUTIONS GROUP —

Flooding can have a direct impact on a property and its occupants, as well as on the property's insurability, mortgagability, saleability and value. Understanding this risk is key to giving you or your client the confidence needed to make that important property purchase or investment decision. Starting from just £150 + VAT, our trusted flood experts are on-hand to guide you whether it be for a residential or commercial property.

The Flood Appraisal service is designed to complement our comprehensive range of due-diligence products, providing an enhanced view where a known flood risk exists. The FCI Flood Appraisal is a property specific, fully manually assessed report, delivering expert independent insight in collaboration with our partners at Ashfield Solutions Group. Detailed analysis of the flood risk, derived from complementary data sources and flood mapping coupled with unrivalled experience gives clarity, and ultimately makes those all-important decisions on property acquisition that much easier.

When to use?

We recommend an FCI Flood Appraisal is undertaken where a 'Further Action' has been identified within the flood section of an initial FCI Commercial or Residential Environmental Search report. Flooding can often occur from a complex interplay of events, and a trained eye is key to delving deeper and understanding the risks with greater clarity.

Designed to guide and inform all stakeholders including home buyers and sellers, commercial investors, business owners, conveyancers and professional advisors.

Unrivalled Insight

Our combination of industry expertise, access to data and ability to analyse and interpret additional flood-risk information sources means we can offer unparalleled insight into property-specific flood risk. We understand what matters to prospective homeowners and commercial property investors and where the differences lie, so our advice is tailored to meet the situation.

Managing Risk Where Necessary

Flood risk cannot always be fully negated. However, this doesn't mean a purchase or investment should be abandoned. Understanding the impacts is key. In these situations, expert advice from our partners at Ashfield Solutions Group will help define what level of risk is acceptable for your client's circumstances, and where necessary the solutions which may be available to manage risk in the long term.

- ▶ **Manual Assessment.** By a qualified Flood Consultant.
- ▶ **Professional Opinion.** With clear Outcomes and details of Revised Flood Risk.⁽¹⁾
- ▶ **Property-Specific.** Considers additional factors (e.g. Ground Levels, Property Thresholds or the presence of Basements) as part of the assessment.
- ▶ **Location Context.** Review of Property Photography (where available or provided).
- ▶ **Key Research.** Review of Local Authority Records and Planning Applications.⁽²⁾
- ▶ **Local Attributes.** Details of Flood Defences and Flood Warning / Alert History.
- ▶ **Forward Planning.** Advice on potential Redevelopment Constraints & Occupation / Operational Risks.⁽²⁾
- ▶ **Robust Due Diligence.** Complies with the Law Society's Flood Risk Practice Note.
- ▶ **Clear Recommendations.** Given where required for appropriate Resilience or Resistance measures.
- ▶ **Outcomes.** Summary of potential Impacts, and a clear Insurability Statement.

FCI Flood Appraisal

The combined services of FCI and Ashfield Solutions Group exist to simplify and resolve risk, in whatever form.

Our services enable you, or your client, to make an informed decision on the purchase of a property or assist those selling their property to resolve the concerns of potential purchasers.
